| Number of Locations | 1 |
| Number of Physicians | 1 |
| Number of Employees | 2.5 |
| Number of Clinical Users | 2 |
| Number of Non-clinical Users | 1.5 |
| PM Vendor/Interface | HealthMatics® PM |
| Hardware | Dell® servers and PCs, Fujitsu® handheld device |

"We chose to integrate HEALTHMATICS EMR and HEALTHMATICS PM because of the flexibility and ease of use – we would not have it any other way. Almost no staff time is wasted looking for charts, and our instant access to information when taking patient related calls increases their quality of care."

**Saundra Dennis,
Administrator**

SEEKING THE BEST SOLUTION

HEALTHMATICS EMR was chosen for flexibility and interfacing capabilities with both the existing HEALTHMATICS PM system and hospital systems. Other key deciding factors included the EMR's ease of use, output formatting capabilities, and ability to meet documentation needs in a diverse population.

COUNTING THE BENEFITS

The most important benefits of implementing the A⁴ solutions have been great improvements in consistency and accuracy of documentation. Additionally, almost no staff time is spent looking for charts, and there is instant access to information when taking patient related calls.

LOOKING AHEAD

Wellspring Women's Health Care has seen such positive results from implementing the technology that they have decided to take the process a step further. There are plans in place to implement both a lab and a radiology interface to the current system.

"HEALTHMATICS EMR consistently performs well – the smooth workflow and accuracy of documentation saves me so much time."

Margaret Orr, MD
